Mushroom farming has become a profitable income source for small farmers in recent years. The production technique is entirely different from other vegetables as mushrooms can be grown on plants, sawdust, wood, husk, straw, and hay, etc. The cultivation process requires very little space and does not need fertile soil. These advantages driving mushroom production and cultivation as a primary business for marginal or landless producers.

Many farmers are generating additional income through mushroom production during lean seasons.

Some key findings in the report:

- In January 2019, South Mill Mushrooms and Champ's Mushrooms combined forces to create

the leading mushroom producer and supplier in North America. This agreement helped South Mill Mushrooms meet rising demand in all mushroom marketplace segments throughout the United States and Canada.

- Button mushroom segment is expected to register a relatively higher revenue CAGR throughout the forecast period. This can be attributed to increasing demand for button mushrooms due to nutritional properties and easy availability.
- Asia-Pacific accounted for the major share in the global mushroom cultivation market. This can be attributed to increasing consumption of mushrooms and adoption of more modern mushroom cultivation processes in countries in the region.
