- Sun Pharmaceuticals Industries Ltd

## Global Skin Cancer Treatment Market Segmentation –

The research provides detailed segmentation of the global skin cancer treatment market based on type, therapy, distribution channel, and region. The research discusses segments along with their sub-segments to identify the largest revenue-generating and fastest-growing segments for market players and startups. Market size and estimations for each segment and its sub-segment are offered in the report to identify the steps that can be adopted for achieving the growth.

Based on type, the melanoma segment held the highest share in 2021, accounting for more than four-fifths of the total share, and is projected to continue its leadership status during the forecast period. However, the non-melanoma segment is expected to manifest the highest CAGR of 8.8% from 2022 to 2031.

Based on therapy, the immunotherapy segment accounted for the highest share in 2021, contributing to more than three-fifths of the global skin cancer treatment market, and is projected to maintain its lead in terms of revenue during the forecast period. However, the targeted therapy segment is expected to manifest the highest CAGR of 8.6% from 2022 to 2031. The report also analyzes the chemotherapy segment.

Based on distribution channel, the drug stores and retail pharmacies segment contributed to the highest share in 2021, holding nearly half of the market, and is expected to dominate in 2031. However, the online providers segment is projected to grow at the highest CAGR of 8.5% during the forecast period. The research also discusses the hospital pharmacies segments.

Based on region, North America accounted for the highest share in 2021, holding more than two-fifths of the global market, and is expected to maintain its dominance by 2031. However, Asia-Pacific is estimated to grow at the fastest CAGR of 8.6% during the forecast period. The research also analyzes regions including Europe and LAMEA.
