Reports And Data

NEW YORK CITY, NEW YORK, UNITED STATES, November 9, 2022
/EINPresswire.com/ -- The global

[Thermal Paper market](#) is forecast to reach USD 6.75 Billion by 2030, according to a new report by Reports and Data. The market is seeing an expanded interest from the billing operations, owing to its characteristic of faster and efficient printing. However, the rising prevalence of stringent regulations from the Occupational Safety and Health Administration (OSHA), which aims to limit Bisphenol-A (BPA) levels, as thermal paper base contains at least one coating of the highly toxic chemicals, may hamper the demand of Thermal Paper in the market.

Rapid urbanization has changed the way of life of individuals and, thus, has expanded the pervasiveness of the point of sale (POS) and billing operations over a broad aspect; therefore, augmenting the demand for the market product. Furthermore, increasing awareness regarding less utilization of paper for billing applications and rising online transactions for e-commerce applications have increased the use of digital receipts, which will be hindering the growth of the Thermal Paper market.
