As per The Business Research Company's "Explosives Global Market Report 2022", the [explosives market](#) size is predicted to reach a value of \$36,568.4 million in 2021, having grown at a compound annual growth rate (CAGR) of 0.4% since 2016. The explosives market growth is expected to increase from \$36,568.4 million in 2021 to \$40,093.2 million in 2026 at a rate of 1.9%. The market is then expected to grow at a CAGR of 1.7% from 2026 and reach \$43,605.4 million in 2031. The increase in territorial and political conflicts have been the major driver in the forecast period. Tensions between countries, like India, Pakistan, and China, nuclear weapons testing by North Korea, and incidents like the unrest in Syria, have forced the neighboring nations to strengthen their armed forces, increasing demand for weapons and explosives.

Key Trends In The Explosives Market

Explosives companies globally are taking full advantage of digital technologies in their operations including blasting. Digital tools help in optimizing blasting outcomes and enhance all downstream processes.

For example, in 2022, Strayos, a US-based AI platform for mine to mill optimization and a global mining technology company, CR Digital, announced the implementation of a new integration project that will introduce CR Digital's Thunderbird 1110 drill optimization system, combined with Strayos blast design and optimization tools.

Similarly, BME, a South African based blasting and explosives company continues to fuel its digital technology in progressing its productivity solutions for mining customers.

The major benefit of digital tools in blasting includes creating a virtual, 3D replica of physical assets, equipment, structures and entire mining sites

Overview Of The Explosives Market

The explosives market consists of sales of explosives by entities (organizations, sole traders, and partnerships) that are engaged in the production and distribution of explosives. Explosives refers to materials, mixtures, and chemical compounds that have high potential energy which produces an explosion if released suddenly, usually accompanied by the production of light, heat, sound, and pressure.
