

Telehealth Market Overview Highlighting Major Drivers, Trends, Growth and Demand Report 2026

the global Craniomaxillofacial Implants market was valued at USD 1.93 billion in 2018 and is expected to reach USD 3.29 billion by the year 2026

NEW YORK, NEW YORK, UNITED STATES, November 9, 2022 /EINPresswire.com/ --

High prevalence of incidences of congenital facial deformities, increasing awareness about minimally invasive techniques, escalation in the number of injuries due to road accidents and other traumas, various technological advancements in the field of Craniomaxillofacial Implants are key factors contributing to high CAGR in the forecast period.

According to the current analysis of Reports and Data, the global Craniomaxillofacial Implants market was valued at USD 1.93 billion in 2018 and is expected to reach USD 3.29 billion by the year 2026, at a CAGR of 6.8 %. Craniomaxillofacial Implants are the medical accessories that are embedded for the injuries, diseases, congenital facial disorders in the head, neck, jaw, and face, hence treating the deformed site. According to the Association for Safe International Road Travel, about 20-30 million get injured or disabled in road accidents, which is amongst the key driving factors for the Craniomaxillofacial Implants. The material of manufacturing the Implants has now been improved, such that they can be contoured easily. For instance, biomaterials and other polymers. The rise in the road accidents and traumas, hike in the sports injuries, increasing prevalence of congenital facial disorders (for instance, Cleft lip or palate) are the factors that are expected to be responsible for fueling the growth of the market. According to the World Health Organization, an oral cleft is observed in approximately 1 in every 700 live births in the United States of America.

Furthermore, the increasing need to experience better aesthetics, growing demand for minimally invasive procedures across the globe is the primary factor that fosters the growth of the Craniomaxillofacial Implants market. There are various technological advancements in the field of medical devices such as autoclavable cleft, which is expected to boost the market. Moreover, in June 2019, Stryker announced that it is to invest over €200 million in Research, Development, and Innovation (RD&I) projects to deliver next-generation products and services across its medical, surgical, and orthopedic.

The report provides comprehensive assessment of the market covering key elements such as revenue estimations, cost analysis, import/export, production and consumption trends, CAGR, gross margin, and supply & demand patterns. It also sheds light on recent technological developments, product advancements, and research and development activities in the region.

The report examines the key players operating in the market along with their market position, market share, revenue, gross margin, and business strategies. SWOT analysis and Porter's Five Forces Analysis are used to examine and assess the market and its players. It also covers recent mergers and acquisitions, joint ventures, collaborations, agreements, partnerships, and product launches and brand promotions.

Key companies profiled in the report include:

Medtronic, Stryker, Depuy Synthes, KLS Martin, Zimmer Biomet, Integra Lifesciences, OsteoMed, Medartis, Matrix Surgical USA, and Calavera.

Market Segmentation by Types:

Type Outlook (Revenue in Million USD; 2016–2026)

Cranial or Neuron Implants

Screws

Contourable Mesh

Plates

Mid Face Implants

Screws

Plates

Mandibular Orthognathic Implants

Screws

Plates

Cranial Flap fixation

Bone Grafting Substitutes

Distraction Systems

Thoracic Repair System

Dural Repair Products

Dural Sealants

Dural Substitutes

Total TMJ Replacement System

Material Type Outlook (Revenue in Million USD; 2016–2026)

Titanium Metals and alloys
Calcium Phosphate Ceramics
Polymers
Biomaterials
Resorbing - ability Outlook (Revenue in Million USD; 2016–2026)

Resorbable Fixators
Non- Resorbable Fixators
Location Outlook (Revenue in Million USD; 2016–2026)

Internal Fixators
External Fixators
Application Outlook (Revenue in Million USD; 2016–2026)

Orthognathic Surgeries
Dental Surgeries
Neurosurgeries
ENT Surgeries
Plastic Surgery
End-Use Outlook (Revenue in Million USD; 2016–2026)

Hospitals & Clinics
Ambulatory Surgical Centers
Others

Regional analysis covers in-depth analysis of analysis of the revenue, market share, and growth rate of the global [Telehealth market](#) in each region for the forecast period of 2021-2028. The report covers production and consumption rate, current and emerging trends, import/export, supply and demand, and presence of key players in each region.

North America

U.S.

Canada

Mexico

Europe

Germany

U.K.

Italy

France

BENELUX

Rest of Europe

Asia Pacific

China

India

Japan

South Korea

Rest of APAC

Latin America

Brazil

Rest of LATAM

Middle East & Africa

Saudi Arabia

U.A.E.

South Africa

Rest of MEA

Further key findings from the report suggest

According to the Centers for Disease Control and Prevention (CDC), it is estimated that each year in the United States, about 2,650 babies are born with a cleft palate, and 4,440 babies are born with a cleft lip with or without a cleft palate. Furthermore, the growth in the demand for better aesthetics would drive the market of Craniomaxillofacial Implants.

Titanium has been the most used product after conventional inserts, but the stress shielding effect on bone, possible interference with the growth of the affected region is an important factor resulting to the removal of these inserts. The recent innovation was Resorbable type of embeds, which degrades slowly into the body and hence stays for a time period such that the bone unites as earlier.

About 20-50 million injuries take place in road accidents globally, according to the Association for Safe International Road Travel. The injuries and the deformities caused need inserts for the head, face, neck, jaw region. This growth in demand for such inserts is expected to help the market gain traction in the coming years.

The recent advancement, especially in the material type, has been made. For instance, Craniomaxillofacial Implants made up of biomaterials and polymers, can be easily contoured and showed lesser side effects post-surgery. It is expected to gain attention amongst the healthcare providers, plastic surgeons, and provide lucrative growth to the market during the forecast period.

The key players in this sector are focusing more on the technological advancements. For instance, Aesculap, has brought up the first double-sided cranial fixation system, CranioFix2, which allows cranial flap fixation in less than two minutes, because of the ease in the application and use of the product. Furthermore, this product is expected to allow higher stability post-surgery and hence would help the market to grow due to such innovations.

About Reports and Data

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target and analyze consumer behavior shifts across demographics, across industries and help client's make a smarter business decision. We offer market intelligence studies ensuring relevant and fact-based research across a multiple industries including Healthcare, Technology, Chemicals, Power and Energy. We consistently update our research offerings to ensure our clients are aware about the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise.
