Check Walmart's Black Friday Deals for Days event to shop more live deals across different product categories. Consumer Walk earns commissions from purchases made using the links provided.

Offices, establishments and homes can benefit from having a generator during times when power is unstable. There are various types of generators—from inverter types to gas-powered, as well as solar portable power stations. Inverter generators, from brands such as Honda, DuroMax, Champion and more, are excellent for powering small homes and buildings. Solar portable power stations, on the other hand, are useful for powering smaller devices and some home appliances during emergency situations. Some of the most popular portable power stations are from brands such as Jackery, Bluetti, EcoFlow and Goal Zero.

Brands such as Honda, Champion, Westinghouse and DuroMax specialize in heavy duty and portable generators. If you prefer a more environmentally friendly alternative, portable power stations that can be recharged using solar panels are available from Jackery, Bluetti and Goal

Zero.

In areas where power outages are a common occurrence, a generator is a useful piece of equipment. Portable power stations have built-in batteries that can be recharged via a power outlet, a car outlet or solar panels.
