Oriented strand board is a widely used, versatile engineered wood board made from waterproof, heat curing adhesives, and rectangular shaped strands of wood arranged in cross-oriented layers. It is a type of engineered wood. OSB is manufactured in various grades with improving resistance to the effects of moisture. The combination of wood and adhesives in OSBs creates a strong, dimensionally stable panel that resists deflection, delamination, and distorting. Moreover, these panels resist racking and shape distortion when subjected to demanding wind and seismic conditions.

Covid-19 impact:

- Construction and manufacturing activities of oriented strand board halted due to the implementation of the global lockdown.
- Moreover, supply chain disruptions, shortage of labor force, and unavailability of raw materials

created several challenges in carrying out manufacturing in full capacity.

- Several construction activities were delayed in order to maintain the social distancing norms.
- The demand from end use industries reduced significantly due to halt in day-to-day operations in 2020. However, the demand would grow steadily during post-lockdown as daily operations get back on track.
- The ban on import-export activities led to supply chain disruption and supply-demand gap. As the restrictions are lifted off, the supply chain will be restored.

Competitive Landscape:

coillte, Egger Holzwerkstoffe GmbH, Koch Industries (Georgia Pacific), Kronospan Ltd, Louisiana Pacific Corporation, West Fraser, swiss krono group, sonae industria, tolko industries, Weyerhaeuser Company These players have adopted different strategies such as new product launches, collaborations, expansion, joint ventures, agreements, and others to increase their market share and maintain dominant shares in different regions. The report is valuable in highlighting business performance, operating segments, product portfolio, and strategic moves of market players to showcase the competitive scenario.

Key Benefits for Stakeholders:

- This report offers a quantitative analysis of the market segments, current trends, estimations, and dynamics of the operating room equipment market analysis from 2020 to 2031 to identify the prevailing operating room equipment market opportunities.
- The market research is offered along with information related to key drivers, restraints, and opportunities.
- Porter's five forces analysis highlights the potency of buyers and suppliers to enable stakeholders make profit-oriented business decisions and strengthen their supplier-buyer network.
- In-depth analysis of the operating room equipment market segmentation assists to determine the prevailing market opportunities.

- Major countries in each region are mapped according to their revenue contribution to the global market.
- Market player positioning facilitates benchmarking and provides a clear understanding of the present position of the market players.
- The report includes the analysis of the regional as well as global operating room equipment market trends, key players, market segments, application areas, and market growth strategies.
