

PortraitPro 23 Software Launched Introducing Brand New Features Including: Flyaway Hair tools, M1/M2 Chip Support & More

LONDON, ENGLAND, UNITED KINGDOM, November 10, 2022

[/EINPresswire.com/](https://EINPresswire.com/) -- The release of PortraitPro 23 has been announced by creators, Anthropics Technology. The latest AI-powered tools included in the software let photographers edit their photos quickly and more intuitively than ever.

New features include: Flyaway Hair tools, M1/M2 Chip Support, Stylistic Art Effects, Backlighting Brush, speed improvements and more.

Key New Features:

NEW Stray Hair Removal Tool:

PortraitPro 23 includes a new tool for removing unwanted hair.

Photographers can easily tidy flyaways and even erase stubble and facial hair for a more clean-shaven look.

NEW M1/M2 Mac Support: PortraitPro

23 now guarantees full native compatibility and faster processing speed for M1/M2 Mac users as well as improved efficiency across the board. Native support for Apple M1/M2 chips makes PortraitPro 23 up to 60% faster.

NEW Art Effects: Introducing a vast new range of creative effects. Photographers can now edit and stylize their photos with new artistic features. Dramatically change the color, texture and feel of images with iconic art themes such as oil painting and pop art.

NEW Stray Hair Removal Tool

NEW M1/M2 Mac Support

NEW Backlighting Brush: Control background lighting with the new Backlighting Brush. Emphasize your subject and easily give depth to images with bold lighting effects.

Editions:

PortraitPro Standard: Standalone software for photographers working with JPG or 24-bit TIFF files.

PortraitPro Studio: For photographers who work directly with RAW files or want the higher quality of 48-bit color files, supports conversion between different color spaces, and provides JPEG/TIFF embedded color profile support. Offers Batch Dialog.

PortraitPro Studio Max: For professional photographers or those working with a large number of images. Full Batch Mode to speed workflow greatly.
