Halal Food Market Research Report

The global halal food market reached a value of US\$ 1,978 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 3,907.7 Billion by 2027, exhibiting a CAGR of 11.24% during 2022-2027. Halal food represents food and beverage products that are strictly manufactured by following the norms prescribed by Islamic dietary law. As per these regulations, numerous items, including blood, alcohol, animals that were found dead, pork and its by-products, etc., are considered impermissible for consumption. Halal food products are packaged, stored, and transported in containers that have been cleaned as per the prescribed religious guidelines. They include various processed items, such as halal foie gras, pizzas, nuggets, spring rolls, lasagna, etc.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Halal Food Market Trends:

The expanding Muslim population across countries is primarily driving the halal food market. In line with this, the inflating disposable incomes of consumers and the rising utilization of meat products are also catalyzing the market growth. Furthermore, the leading manufacturers are introducing several value-added food items, such as cookies, burgers, hot dogs, etc., that offer diverse tastes to the individuals, which in turn, is acting as another significant growth-inducing factor.

Moreover, the increasing number of e-commerce and e-grocery platforms that provide easy payment options on various halal-certified food products is positively influencing the global market. Apart from this, the growing product popularity among non-Muslim consumers, owing to the elevating need for ensuring food safety and hygiene, is projected to fuel the halal food market over the forecasted period.
