*The Business Research
Company*

forecasts the autoimmune disease diagnosis market is
expected to grow from \$4.77 billion in 2021 to \$6.98 billion
in 2026 at a rate of 7.9%. The global autoimmune disease
diagnosis market size is then expected to grow at a CAGR
of 8.2% from 2026 and reach \$10.34 billion in 2031.
The increased funding for autoimmune diagnostics during
the forecast period drives the autoimmune disease
diagnosis market.

Autoimmune Disease Diagnosis Market Trends

Artificial Intelligence is being increasingly incorporated with rapid diagnostic test kits to increase the efficiency of diagnosis. Artificial intelligence (AI) refers to the simulation of human intelligence in computer-controlled machines that are programmed to perform tasks, which usually require human intelligence. Artificial Intelligence algorithms are being used to integrate

the findings of clinical symptoms, family history, and laboratory testing to increase the chance of early detection of autoimmune diseases.

Autoimmune Disease Diagnosis Market Overview

The autoimmune disease diagnosis consists of sales of diagnostic tests and related services by entities (organizations, sole traders and partnerships) that are used for the diagnosis of autoimmune diseases. Autoimmune diseases are the diseases in which the production of antibodies takes place in the body which attack and destroy the patient's own healthy cells in the body. These include Crohn's disease, rheumatoid arthritis, Hashimoto's disease, multiple sclerosis, Grave's disease, psoriasis, coeliac disease, type 1 diabetes, lupus and inflammatory bowel syndrome, and are diagnosed by immunological tests.
