[Masks \(N95 Respirators And Other Surgical Masks\) Market Trends](#)

The masks manufacturing companies and research organisations are focusing on developing

innovative masks with integrated artificial intelligence technologies, to increase the performance of the respirator, embedded in the product. Artificial Intelligence (AI) is a branch of computer science that deals with the simulation of human intelligence through robotic devices. Artificial intelligence is applied in masks for analysing and interpreting the data collected by the devices. The predictive analytics offered by machine learning, a branch of Artificial Intelligence, helps researchers to analyze respiratory patterns during different activities.

#### Masks (N95 Respirators And Other Surgical Masks) Market Overview

The masks (N95 respirators and other surgical masks) market consists of sales of N95 respirators and other surgical masks (face masks) by entities (organizations, sole traders, and partnerships) that are used as personal protective equipment to protect the wearer from airborne particles and from liquid contaminating the face, or to ensure the wearer does not contaminate the area around them. The market consists of revenue generated by companies that are manufacturing and selling N95 respirators and surgical face masks.
