

EvidenceCare Partners with Williamson Medical Center to Launch Clinical Software

EvidenceCare announced a partnership with Williamson Medical Center to develop two clinical decision support products in MEDITECH Expanse.

BRENTWOOD, TN, USA, November 14, 2022 /EINPresswire.com/ -- EvidenceCare, a local healthcare tech company, announced a new partnership with Williamson Medical Center (WMC) to deliver real-time clinical insight to physicians inside the Electronic Health Record (EHR).

Two of EvidenceCare’s innovative decision support products, [AdmissionCare](#) and [CareGauge](#), will be developed in Williamson Medical Center’s instance of MEDITECH Expanse for physicians to use directly in their EHR workflow. Already live in other health system’s EHR systems, this will be the first instance of AdmissionCare and CareGauge in MEDITECH Expanse.

“

We are always looking for innovative ways to equip our physicians... The partnership with EvidenceCare will ensure that our doctors have easy access within the EHR to the best clinical insights.”

*Bradley Bullock, M.D.,
Hospitalist Program Officer of
WMC*

“Our products are reshaping the landscape of clinical decision support software, but we couldn’t do it without partners like Williamson Medical Center to deliver it in specific EHR systems,” said Bo Bartholomew, CEO of EvidenceCare. “We’re grateful to play a part in hospitals like WMC being more efficient in their care delivery.”

AdmissionCare streamlines the admission process for physicians by putting the criteria for bed status determinations directly in the EHR, reducing the time and money required to fix mistakes later by the revenue cycle and utilization management teams.

CareGauge gives physicians a real-time view of how their care decisions for a patient compare to locally benchmarked patients with that same condition, reducing care variation and unnecessary

cost.

“We are always looking for innovative ways to equip our physicians to deliver the best care possible,” said Bradley Bullock, M.D., Hospitalist Program Officer of Williamson Medical Center. “The partnership with EvidenceCare will ensure that our doctors have easy access within the EHR to the best clinical insights.”

“WMC has already been a great partner through the process of mapping the development and integration requirements, and we’re excited to see the impact of our partnership,” said Brian Fengler, M.D., Chief Medical Officer and Co-Founder of EvidenceCare. “Doctors don’t want more invasive tools, which is why EvidenceCare designed our products to be integrated in physician workflows to empower physicians, not limit them.”

ABOUT EVIDENCECARE

EvidenceCare is a unique clinical decision support system (CDSS) with its EHR-integrated platform that optimizes clinician workflows to deliver better patient care, reduce hospital costs, and capture more revenue. Founded in response to the professional experience of emergency physician Dr. Brian Fengler, the platform provides clinicians with evidence-based care and measurable outcomes.
