interpretation of the Women's Health

market dynamics, including the crucial drivers, opportunities, threats, and challenges. The report also describes the key business strategies, demand and supply ratios, leading regions, and the renowned market players, in a nutshell, offering a futuristic outlook of the overall Women's Health industry. The market intelligence report is a prototype of the 360° overview of the global Women's Health industry, shedding light on the estimated market value, share, growth trends, gross revenue, competitive overview, prominent manufacturers and buyers, available product types, and end-use applications

women's health market is expected to reach USD 24.48 Billion by 2027, according to a new report by Emergen Research. The women's healthcare market is experiencing high demand attributable to a growing demand for devices (intrauterine devices, vaginal rings, and implants) and drugs (Provia, Evista, Xgeva, Mirena, and Zometa, among others) in applications comprising contraceptives, postmenopausal osteoporosis, hormonal infertility, menopause, endometriosis, and polycystic ovary syndrome (PCOS), among others.

Use of female contraception is beneficial in the prevention of health issues associated with pregnancy, particularly for pubescent girls, as well as in pregnancy planning to reduce the chances of infant mortality, which is higher in childbirths separated by a lesser number of years. Besides, it provides various other prospective benefits comprising prolonged prospects for

education and women empowerment, along with maintaining a healthy population and economic growth of nations.

Increasing investments in femtech would give the players in the industry many growth opportunities, thus boosting the women's health market over the forecast period. Novel femtech such as wearable tools for recording and controlling the health of patients are likely to propel women's health market demand in the upcoming years. Firms engaged in the production of mobile apps associated with menstruation and or fertility-tracking comprise, Clue, Glow, DOT, Eve, and Cycles, among others
