

ERP Software Company, Proteus 420, Partners with Mobile Payment Platform, Zenco, to Streamline Dispensary Shopping

The cannabis technology integration delivers seamless payment processing for merchants and cashless purchasing options for their customers.

SAN DIEGO, CALIFORNIA, UNITED STATES OF AMERICA, November 15, 2022 /EINPresswire.com/ -- [Proteus 420](#), an online enterprise resource planning (ERP) system for businesses in e-commerce, retail, healthcare, and highly regulated industries, including alcohol and cannabis, today announced a strategic partnership with mobile payment platform, [Zenco](#). The technology collaboration offers Proteus 420 merchants a streamlined and cashless shopping experience for their customers.

Proteus 420 is an online enterprise resource planning (ERP) system specializing in customer management, point of sale, inventory management, e-commerce, accounting, document storage, grow management, and driver tracking.

“

Attendees will be able to see in real time how we can streamline dispensary payments and how merchants can improve their operations safely and compliantly.”

Dawne Morris, CMO and co-founder of Proteus 420

Powered by Zencorn, LLC, a single-source tech hub for cannabis payment solutions, the Zenco platform connects dispensary retail stores with mainstream, federal financial networks through a closed-end payment loop network. Designed to process purchases that cannabis operators cannot typically process, Zenco provides secure and compliant cashless payments through ACH transfers with transparent auditing.

“We’re thrilled to be able to offer this valuable payment solution to our Proteus 420 dispensary customers. The fintech platform upgrades the customer experience with

faster checkout times and ease of purchasing, while simultaneously improving and maximizing dispensary sales,” explained co-founder and CMO of Proteus 420, Dawne Morris.

Proteus 420 goes beyond seed-to-sale tracking, specializing in customer management, point of sale, inventory management, e-commerce, accounting, document storage, grow management, and driver tracking. A validated software provider with METRC, and other state reporting systems, Proteus 420 is currently being utilized by cannabis operators in every legal U.S. market.

Zenco is known for securely and compliantly helping businesses integrate with their point of sale solution. Recently partnered with Proteus 420, both will be in attendance with a shared booth at MJBizCon 2022.

“This is truly a symbiotic partnership,” stated Dev Nath, Director at Zencorn, LLC. “We’re leveling the playing field for Proteus 420 merchants by delivering a cost-effective and cashless payment platform, while also expanding Zenco’s geographic footprint to new cannabis markets across the country.”

Proteus 420 and Zenco will exhibit together at MJBizCon Las Vegas and perform live hourly demos of the payment software solution.

“Attendees will be able to see in real time how we can streamline dispensary payments and how merchants can improve their operations safely and compliantly,” explained Morris.

In addition, Proteus 420 has recently released a whole new interface courtesy of the Zenco mobile banking platform.

“This partnership is about bringing cannabis retail into a normal transaction pattern to benefit merchants who are already faced with many challenging restrictions as a cannabis operator. When shoppers are no longer confined to the cash they have on hand, the opportunity for growth is boundless,” said Nath.
