Multi cooker represents a modern electric household device that is utilized for automated cooking. It consists of various parts, such as a lid, temperature and pressure sensors, a control panel, an inner bowl, a condensate collector, etc. A multi cooker is a device which can be used to roast, bake, stew, fry, boil, grill, steam, and prepare yogurt. These appliances reduce the number of calories in the food as they use less oil or fat for cooking, thereby promoting healthy eating habits. Owing to the convenience of use delivered by multi cookers, they have gradually replaced several kitchen appliances, including stoves, ovens, deep fryers, microwaves, bread-maker, pans, etc. These devices are extensively available across supermarkets, homeware stores, hypermarkets, departmental stores, electrical goods retailers, online channels, etc.
