The report also includes competitor and regional analysis, and contemporary advancements in the market.

Digital Remittance Market Report

The global digital remittance market is expected to exhibit a CAGR of 15.4% during 2022-2027. Digital remittance is the cross-border transfer of money or payments of a bill or invoice between two or more parties through the internet. It includes fund transfers between residents, non-residents and earnings transfer from short-time workers from other countries to their native country. Digital remittance involves inward and outward remittance, which is commonly conducted through digital transfer networks, such as e-wallets and smartphones. The transactions are controlled through banks, money transfer operators and other financial entities for personal consumption, savings, and investments of individuals. They are highly cost-effective, transparent, secured, and convenient to use.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

## Digital Remittance Market Trends:

A significant growth in the banking, financial services, and insurance (BFSI) sector across the globe is primarily driving the market growth. Moreover, the increasing adoption of digital and automated payment solutions, along with the introduction of real-time banking technology to leverage Immediate Payment Service (IMPS), is also providing a thrust to the market growth.

Besides this, due to the continuous spread of coronavirus disease, there has been a rise in the demand for digital remittance solutions to move funds across different regions without involving any human interaction. Various other factors, including increasing expenditure capacities of the consumers coupled with rapid urbanization and industrialization, are projected to further catalyze the market growth in the coming years.
