[The global cholesterol API market](#) is estimated to garner a revenue of ~USD 416.6 Million by the end of 2030 by growing at a CAGR of ~5% over the forecast period 2022 – 2030. Moreover, the industry generated a revenue of ~USD 260.7 Million in 2021. The development of the market is primarily attributed to its being a significant compound for the stability of a liposomal membrane formulation which is used in numerous kinds of vaccines and drug delivery systems to get optimum results.

Ascension Sciences published a December 2020 study that found that liposome formulations are influenced by parameters such as stability, size, and encapsulation effectiveness. The amount of cholesterol in a liposome formulation greatly influences its stability. Higher levels of cholesterol lead to larger liposomes that are less effective at encapsulation and retain more drugs.
