Segmental Analysis:

1. Freeze Drying is estimated to be the fastest-growing, with a CAGR of 4.2% over the forecast period of 2022-2027. This growth is owing to the factors such as the increase in the demand for freeze-drying technology for French beans and the rise in investment by the key players to develop advanced freeze-drying technologies.
2. The Online Channels segment is estimated to be the fastest-growing, with a CAGR of 4.4% over the forecast period of 2022-2027. It is owing to the advancements in technology and the growing adoption of dehydrated vegetables on online channels. According to the latest Gallup poll, 9% of consumers in the United States buy grocers online at least once a month.
3. The Dehydrated Green Beans market based on Geography can be further segmented into North America, Europe, Asia-Pacific, South America, and the Rest of the World. North America held a dominant market share of 35% in the year 2021 as compared to its other counterparts. It is owing to the rise in the demand for French beans and string beans, and the rise in awareness about the health benefits of dehydrated vegetables.
4. According to the United States Department of Agriculture (USDA), the average production of snap green beans in the United States each year is almost 800,000 tons. Green beans are the third most popular vegetable grown in backyard gardens in the country, after peppers and tomatoes.

5. According to the National Center for Biotechnology Information (NCBI), Freeze Drying Technology has the ability to reduce the moisture content of vegetables and grains to 5.19% from 90.02% of fresh vegetables and grains. Freeze Drying is one of the most widely used technology for converting liquid food products into powdered and dried forms.

Competitive Landscape:

The top 5 players in the Dehydrated Green Beans industry are -

1. Garlico Industries Ltd
2. BC Foods
3. HSDL Innovative Private Limited
4. Colin Ingredients
5. Freeze-Dry Foods GmbH
