Wood Products Market Trends

The increasing demand for supply chain transparency in the wood industry has led to the implementation of tracking and tracing technologies. Many wood companies are implementing their own tracking systems to maintain transparency in their wood supply chain. Electronic tracking is being adopted by the wood companies and government agencies over paper-based systems and technologies such as radio-frequency identification chips, barcodes and advanced

traceability software are being used.

Wood Products Global Market Overview

The wood products global market consists of sales of wood products by entities (organizations, sole traders and partnerships) that produce or make products derived from wood. This industry includes establishments that produce lumber, plywood, veneers, wood containers, wood flooring, wood trusses, prefabricated homes and prefabricated wooden buildings. Production of wood products include sawing, planning, shaping, laminating, and assembling of wood products into bolts or lumber. The wood products global market is segmented into finished wood products; wood processing and manufactured wood materials.
