

Skyangel leads their field in cargo monitoring with GpsGate fleet tracking software

Skyangel's GPS monitoring service uses GpsGate to track vehicles in real-time. Geofences, alerts, and reporting give team full visibility over fleet cargo.

STOCKHOLM, SWEDEN, November 16, 2022 /EINPresswire.com/ -- Cargo trucks carrying expensive electronics and pharmaceuticals are targets for vehicle hijackers. GpsGate's fleet tracking platform powers Mexico-based Skyangel's to ensure that truck drivers and cargo make it safely to their end destinations. A leader in GPS monitoring and security, Skyangel uses real-time tracking, behavior-triggered notifications, and map rules to serve cargo customers like Mabe and DHL Supply Chain.

Skyangel control room fleet monitoring with GpsGate

From their in-house monitoring centers, the ISO-certified SkyOne and Copernico work 24 hours a day, 365 days a year to monitor over 12,000 fleet units.

“

We have found a great ally in GpsGate. With GpsGate, we have an excellent tool that allows us to automate tasks, improving our customer service.”

*Juan Manuel Vázquez, CIO,
Skyangel*

Each commercial customer has unique needs and Skyangel's team creates a custom application within GpsGate to serve them best.

Vehicle type, cargo type, and even travel routes are considered in their security planning. When consumer cargo trucks cross the border from the US to Mexico, the chance of vehicle hijacking increases. In the event of foul play, Skyangel's team works with local authorities to get cargo drivers the help they need quickly. Signal jamming

detection and driver SOS signals from GpsGate's software help Skyangel boast a vehicle recovery success rate of 95.3%.

“We have found a great ally in GpsGate,” says Juan Manuel Vázquez, CIO, Skyangel. “With

GpsGate, we have an excellent tool that allows us to automate tasks, improving our customer service.”

High responsiveness and accurate data from GpsGate gives Skyangel the horsepower they need to provide great service. More than just real-time tracking, Skyangel uses extensive reporting to give customers a full picture into fleet operations. Strong network uptime means that fleet owners never have to worry about driver and cargo safety. For Skyangel, a partnership with GpsGate means reliable service and a platform that promotes growth - for Skyangel, and the cargo companies they serve.

About GpsGate

A pioneer in GPS tracking software since 2007, GpsGate’s mission is to make vehicle fleets greener, safer, and more productive. GpsGate’s platform is secure, flexible, and easy to integrate with other business software. Sweden-based GpsGate powers large fleet solutions through its global partner network.
