The Cobra Head Weeder is an outstanding weed puller, digging tool, and planting tool.

THE PERFECT TOOL FOR WEEDING

The CobraHead Weeder is a made-in-America success story. It is named for the shape of the steel digging blade. (Yes, it really does look like the shape of a cobra head.) The CobraHead Weeder might be the best tool ever made for digging out weeds from a garden or lawn. The tempered steel blade is also a great tool for digging and cultivating.

The blue handle, which is made from a mix of recycled plastic and wood fiber, fits well in your hand and is comfortable to use. The handle never gets loose because it is molded around the blade. In addition to the original CobraHead Weeder, there is also a CobraHead Mini that's perfect for smaller hands and smaller weeding jobs. Both CobraHead tools are available [online at Amazon](#).

GIFTS FOR GARDENERS: BOOKS

It's way easier to grow wildflowers than you think. And a wildflower meadow doesn't have to be huge. Those are the two themes in a delightful small book called Mini Meadows by Mike Lizotte.

Mini Meadows is packed with colorful photos of a host of wildflower gardens that easily fit on suburban yards—and even in containers. The book gives details about prepping the soil for planting wildflower seeds, and it includes tips for maintaining a garden of wildflowers. A wonderful holiday present for the gardener in your life (or for yourself). [Available from Amazon](#).
