the lactobacillus probiotic raw material powder market. In addition, the increasing awareness of the health benefits of probiotics is propelling the demand for these products. However, the high cost of probiotic supplements is restraining the growth of the market.

Some of the key findings from the report include:

- From 2018 to 2028, the market for lactobacillus probiotic raw material powder is expected to grow at a compound annual growth rate (CAGR) of **%.
- The demand for probiotic supplements and functional foods and drinks is growing, and more people are learning about the health benefits of probiotics.
- However, the growth of the market is hampered by the lack of scientific evidence regarding the

efficacy of these products. Also, strict rules about food safety and quality are making it harder for the market to grow.

• North America is anticipated to be the largest market for Lactobacillus probiotic raw materials during the forecast period, due to high awareness about probiotic supplements and functional foods and beverages in this region. The Asia-Pacific region is projected to be the fastest-growing market for lactobacillus probiotic raw materials, due to rapidly growing economies in this region, such as China and India.

COVID-19 Scenario

The outbreak of the coronavirus disease (COVID-19) has led to a significant decline in the demand for lactobacillus probiotic raw material powder. The market is expected to witness a slowdown in growth during the forecast period.

The COVID-19 pandemic has had a negative impact on the global economy, with businesses across sectors struggling to sustain operations. The food and beverage industry has been one of the worst-hit sectors, with several countries imposing lockdown measures to contain the spread of the virus. This has led to disruptions in the supply chain and supply of raw materials, resulting in a decline in production levels. Moreover, with people staying indoors and avoiding public places, there has been a decrease in consumption of probiotic products. This has further hampered the growth of the lactobacillus probiotic raw material powder market.
