

# Aspiration and Biopsy Needles Market Key Players, Growth, Statistics, Revenue and Industry Analysis Report by 2030

*Increasing preference for minimally invasive surgeries and biopsies is a key factor driving aspiration & biopsy needles market revenue growth*

VANCOUVER, BC, CANADA, November 16, 2022 /EINPresswire.com/ -- In the latest report from Emergen Research, the market research report discusses the global [Aspiration and Biopsy Needles market](#) in depth, and each of the major market segments is examined in depth. In addition to market information, the report

provides industry statistics, regional market revenue shares, gross profits, production & distribution costs, and product portfolios related to the global Aspiration and Biopsy Needles market. There are also a number of factors influencing industry revenue growth identified in the report, including drivers, opportunities, trends, restraints, challenges, demand and supply ratios, production and consumption patterns, stringent regulatory frameworks, as well as a multitude of other micro- and macro-economic factors. In addition to detailed market projections, the authors of the report have assessed the Aspiration and Biopsy Needles industry quantitatively and qualitatively. In this report, we discuss two of the most important components of this report: SWOT analysis and Porter's Five Forces Analysis. These analyses offer a deep insight into the highly competitive scenario of the industry. In this report, the global Aspiration and Biopsy Needles market is analyzed in relation to major regions in the world, such as North America, Europe, Latin America, Asia Pacific, and Middle East & Africa. Other key aspects of regional markets are also examined in the report, such as revenue growth drivers and restraints, production and consumption patterns, changing consumer preferences, and stringent regulatory regulations. In addition, the researchers have closely studied the remarkable market changes that followed the coronavirus outbreak. This is the newest report examining the current economic situation of the Aspiration and Biopsy Needles industry following the pandemic. Growing preference for minimal invasive surgeries than open and closed surgical biopsies is a major factor expected to drive market growth. Provision of faster and more

accurate and reliable diagnosis of tumors in a resource-restrained setting with minimal requirement of instruments is boosting demand for aspiration & biopsy needles, especially in highly populated and emerging countries. Cost-effectiveness and accessibility of aspiration and biopsy needles are contributing significantly to revenue growth of the market. Ease of detection of cysts, enlarged lymph nodes, and nodules in addition to lower risk of complications are increasing demand for Fine-Needle Aspiration (FNA) in various healthcare settings and diagnostic centers. Furthermore, rapid technological advancements and high value healthcare funding are increasing testing for cancer with needle-based biopsy instruments, which is expected to significantly boost revenue growth of the segment during the forecast period.

The global aspiration & biopsy needles market size was USD 875.3 Million in 2021 and is expected to register a revenue CAGR of 6.8% during the forecast period, according to latest analysis by Emergen Research. Rising prevalence of cancer cases owing to various lifestyle changes, rapid urbanization and rising pollution levels, and changing consumption habits and increasing cancer awareness programs and screening and tests by governments and various global health organizations are some of the key factors driving global aspiration and biopsy needles market revenue growth. According to World Cancer Research Fund International, around 18,094,716 million cases of cancer were diagnosed in 2020. Countries with populations having the highest life expectancy, high standard of living, and education level have higher cancer rates as per International Agency for Research on Cancer. However, for certain cancer such as cervical cancer, the incidence rate is highest in countries with low life expectancy. Growing pollution and tobacco smoking are some of the factors contributing to the increase in cancer rates as well.

According to the National Cancer Institute (NCI), which is a principal agency for cancer research of the U.S. government, the most common cancers are breast cancer, lung cancer, thyroid cancer, prostate cancer, colon and rectum cancer, liver cancer, kidney cancer, leukemia, pancreatic cancer, and bladder cancer. Prostate, colorectal, and lung cancers account for around 43% of all cancer cases in men while breast, colorectal, and lung cancers has been expected to register around 50% of all new cancer cases diagnosed in women in 2020.

**Market Scope:** The report explains the scope of various commercial possibilities in the global Aspiration and Biopsy Needles market over the upcoming years. The estimated revenue build-up over the forecast years has been included in the report. The report analyzes the key market segments and sub-segments and provides deep insights into the market to assist readers with the formulation of lucrative strategies for business expansion.

**Competitive Outlook:** The leading companies operating in the Aspiration and Biopsy Needles market have been enumerated in this report. This section of the report lays emphasis on the geographical reach and production facilities of these companies. To get ahead of their rivals, the leading players are focusing more on offering products at competitive prices, according to our analysts.

Report Objective: The primary objective of this report is to provide the manufacturers, distributors, suppliers, and buyers engaged in this sector with access to a deeper and improved understanding of the global Aspiration and Biopsy Needles market.

The global Aspiration and Biopsy Needles industry is highly consolidated owing to the presence of renowned companies operating across several international and local segments of the market. These players dominate the industry in terms of their strong geographical reach and a large number of production facilities. The companies are intensely competitive against one another and excel in their individual technological capabilities, as well as product development, innovation, and product pricing strategies.

Leading Market Players Profiled in the Report:

Argon Medical Devices, Inc., Boston Scientific Corporation, BD (Becton, Dickinson and Company), Cardinal Health, Conmed Corporation, Dr. Japan Co., Merit Medical Systems, Cook Group, Olympus Corporation, Hakko Co., Ltd., and Inrad Inc

Regional Outlook:

North America (the U.S., Canada, Mexico)

Europe (the U.K., Germany, France, Italy)

Asia Pacific (India, China, Japan, Korea)

Latin America (Brazil, Argentina, Ecuador, Chile)

Middle East & Africa (Egypt, Turkey, Saudi Arabia, Iran)

Furthermore, the report provides the analytical data in an organized format segmented into charts, tables, graphs, figures, and diagrams. This enables readers to understand the market scenario in an easy and beneficial manner. Moreover, the report aims to impart a prospective outlook and draw an informative conclusion to assist the reader in making lucrative business decisions. The report, in conclusion, provides a detailed analysis of the segments expected to dominate the market, the regional bifurcation, the estimated market size and share, and comprehensive SWOT analysis and Porter's Five Forces Analysis.

On the basis of type, the market is segmented into

Product Outlook (Revenue, USD Million; 2019-2030)

Biopsy needles

Vaccum-Assisted Biopsy (VAB) needles

Core-Needle Biopsy (CNB) needles

Aspiration needles

Procedures Outlook (Revenue, USD Million; 2019-2030)

Ultrasound-guided

CT-guided

MRI guided

Image-guided

Stereotactic

Others

Application Outlook (Revenue, USD Million; 2019-2030)

Cancer/Tumor

Lung cancer

Breast cancer

Prostate cancer

Kidney cancer

Bone & bone marrow cancer

Other cancers

Wound

Others

Key reasons to buy the Global Aspiration and Biopsy Needles Market report:

The latest report comprehensively studies the global Aspiration and Biopsy Needles market size and provides useful inference on numerous aspects of the market, such as the current business trends, market share, product offerings, and product share.

The report offers an insightful analysis of the regional outlook of the market.

It offers a detailed account of the end-use applications of the products & services offered by this industry.

The report holistically covers the latest developments taking place in this industry. Therefore, it lists the most effective business strategies implemented by the market rivals for ideal business expansion.
