The global autotransfusion devices market is to grow at a CAGR of approximately 6% over the forecast period. By application. The market is segmented into orthopedic surgery, cardiovascular surgery, neurological surgery, gynecological surgery, obstetrics, and others. The cardiovascular segment is to garner the highest revenue by the end of 2033. This growth is on the account of higher number of people suffering from cardiovascular diseases.

The global autotransfusion devices market growth is attributed to higher blood transfusion, rise in number of people with kidney issues, higher prevalence of chronic disease and higher geriatric population.

On the basis of region, market is segmented into North America, Europe, Asia Pacific, Latin America and Middle East & Africa region. Out of all, the market in North America is to generate

the highest revenue by the end of 2033. Higher number of surgery procedures and rising burden of chronic disease on the region is to grow the market in North America.
