

Prescription to manifest enlightened industrial revolution unveiled for all nations

A thorough plan to correct prior mistakes and material wastes resulted from capitalist consumerism that thrives on boundless expansionism of frequent refreshes.

TAICHUNG, TAIWAN, November 17, 2022 /EINPresswire.com/ -- Enlightened Industrial Revolution is a thorough plan to correct prior mistakes and material wastes resulted from capitalist consumerism that thrives on boundless expansionism of frequent refreshes.

EIR identifies “recycling” as a convenient excuse conjured for industrial designers and marketing professionals to produce and push “diddly-squat innovations” aimed to stimulate superfluous consumption.

EIR uses “Open Connection Architecture” that enables “Distributed Manufacturing” for all nations and reduces shipping needs to only flat PCB boards and industrial-package electronic components.

Casing of products are made locally with 3D-printing or light CNC machines that uses local material that either needs no shipping or material processed nearby.

“ReSpanking” then reuses already produced PCB boards and casings and pass them down through different levels of consumption of required material strength or structural integrity.

“ReSpanking” begins with aerospace grade casings, to medical, military, enterprise, consumer, pre-owned, donation, free-exchange to DIY artisans and are respanked through nine layers as

1. Corrugated Carton Box - 1 PreIncarntate the packaging - Notebook

Total extra cost for both : about USD \$2, just the cost of the velcro needed, and black paint
And the corrugated carton the NB came in, is pre-incarnated while ditching the recycling hoax

Weight of monitor hood : 85g , and the kickstand 31g (one made with aluminum weights > 300g)

PreIncarntated Packaging - Monitor hood and keyboard kickstand made from corrugated carton packaging

hand-me-downs.

A [Missile8964](#) computing device can be produced, used and respanked while saving shipping resources by eliminating the need to ship finished product that creates packaging wastes.

“Pre-Incarnation” clears the name and proves the innocence of plastic and styrofoam by giving them a permanent life span instead of making them disposable that ruined their reputations.

Carton exterior packaging can be pre-incarnated with a library of 3D templates for community laser cutters and make useful furniture, monitor hoods, notebook stands, and even lanterns.

Printed packaging box can be pre-incarnated by printing both sides so inverting them as holiday gift boxes, personal storage is a quick manual process.

“

Pollution is nothing but the resources we are not harvesting. We allow them to disperse because we've been ignorant of their value.”

Buckminster Fuller

Smaller styrofoam sticks can Re-Spank into other home projects that combine carton boards to make useful household items of medium structural strength or give away.

Thicker plastics containers with label insertion mechanism can accommodate brand labels and artworks, so they can be easily swapped for other than initially intended purposes.

Publicly shared 3D-printable caps and lids for containers with standardized design prolongs the

2. Printed Paper Box - 1a

PreIncarntate the packaging - Printable Toys

These four A4 printable make an original RX-78 Gundam (fictional Japanese animation robot) paper model

PreIncarntated packaging with paper RX-78 Gundam paper toy printed on the inside

useful life of containers, as losing them is often the reason for disposal.

The EIR directive reduces the need to ship finished products that require more packaging materials to protect the perfect exterior and jump-starts repairing earth.

Efforts to extend OCA and Distributed Manufacturing to the DSLR and mirrorless, and the automobile industries are underway to bring manufacturing home for all nations.

All projects are hosted under ["raconteuria-by-claritism" on GitHub](#), beginning Thursday, December 01, 2022 (2022-12-01), and please check back with us weekly to cheer on our progress:

3. Shock Absorber Styrofoam

Lego-lize them to pre-incarnate, and reuse

The top graphic shows what it looks like normally. The bottom graphic breaks them up into 3 components.

1. White - Long (300x30x30mm sticks), and Short (150x30x30mm sticks)
2. Yellow - rubber bands (to be reused)
3. Red - The only part needing customization to ship the product in question

Worse case scenario, only the red part needs disposal. They can even be reused if we standardize .

Lego-lized styrofoam shock absorber to ditch the recycling hoax

You are invited to participate as an individual. Contribution as a group or organization of any kind will be confiscated and further participation, even back as an individual, prevented by Soliloque. All projects are open-source and protected by the [Soliloque License](#) to ensure "raconteuria" achieves the three goals of Claritism.

"Nature is a totally efficient, self-regenerating system. If we discover the laws that govern this system and live synergistically within them, sustainability will follow and humankind will be a success." – Buckminster Fuller

Notes to Editors

— Visit : <https://claritism.org> for the list of products and industries affected by Missile8964 and other applications of OCA.

— “raconteuria-By-Claritism” is a goodwill offering for the recognition of independence for “raconteuria – the 1st FOQNE” as a sovereign nation, which declared independence on 2021-09-01.

— Sci-Fi author Neal Stephenson defined FOQNE – “Franchise Organized Quasi-National Entity” in his novel “Snow Crash”.

— “raconteuria” is not named with a capital “R” for a reason. Visit : <https://raconteuria.org> for details about it as a FOQNE.

— The three ultimate goals of raconteuria's constitution “Claritism: Remove Humanity To Rebuild It and Repair Earth”

- Universal Equality
- Enlightened Industrial Revolution
- Priority Earth
