Industry Growth:

The global market is majorly driven by the increasing incidence of chronic diseases. In line with this, the rising geriatric population and growing preference for outpatient care are significantly contributing to the market growth across the globe. Furthermore, various government initiatives and the availability of funding for ambulatory medical facilities are catalyzing market expansion. Apart from this, reduced hospital stays, and decreased healthcare expenditure due to a high preference for minimally invasive surgeries are propelling the market growth. Moreover, rapid technological advancements in ambulatory services are creating a positive outlook for the market. Additionally, the significant expansion of primary care offices is providing a boost to market growth worldwide.
