

Pyrethroids Market to Reach US\$ 4.5 Billion by 2027 | Syngenta United Phosphorus Arysta Lifescience Cheminova

SHERIDAN, WY, UNITED STATES,
November 17, 2022 /

EINPresswire.com/ -- According to IMARC Group's latest report, titled "Pyrethroids Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2027," the global pyrethroids market size reached US\$ 3.4 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 4.5 Billion by 2027, exhibiting a growth rate ([CAGR](#)) of [5.25%](#) during 2022-2027.

Pyrethroids are organic compounds that are similar to the natural pyrethrins, which are produced by the flowers of pyrethrums. They possess identical properties to pyrethrins but are not sensitive to sunlight. Pyrethroids are generally used to kill flies, ants, mosquitoes, moths, farm pests, etc. They exhibit low toxicity towards mammals, birds, reptiles, etc., and are available in the form of granules, wet powders, emulsifying concentrates, and ultra-low volume (ULV) sprays. Pyrethroids have a short shelf life with biodegradable properties and are extensively utilized as household insecticides.

Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report

Market Trends:

The escalating demand for home cleaning and hygiene products is one of the key factors driving the pyrethroids market. Apart from this, the rising product adoption in the agriculture sector as a

cost-effective alternative to conventionally-used insecticides is further catalyzing the market growth.

Moreover, the emerging trend of replacing organophosphates, which are conventionally used on [vegetables](#) like carrots and lettuce, with these insecticides is also augmenting the global market. In line with this, the elevating requirement for agricultural or farming materials that are not toxic to mammals and birds is positively influencing the market growth. Furthermore, the increasing product utilization in cloth [treatment](#) and mosquito control across the residential and industrial sectors is anticipated to fuel the pyrethroids market over the forecasted period.

Competitive Landscape:

BASF
Bayer CropScience
Corteva Agriscience
Nufarm
SinoHarvest Corporation
Sumitomo Chemical
Syngenta
United Phosphorus
Arysta Lifescience
Cheminova
FMC
Monsanto
Shanghai Mingdou Agrochemical
Adama Agricultural Solutions Ltd, etc.

Key Market Segmentation:

Market Breakup by Product Type:

Bifenthrin
Deltamethrin
Permethrin
Cypermethrin
Cyfluthrin
Lambda-Cyhalothrin
Others

Market Breakup by Crop Type:

Cereals & Grains
Oilseeds & Pulses
Fruits & Vegetables
Others

Market Breakup by Pest Type:

Lepidoptera
Sucking Pests
Coleoptera
Diptera
Mites
Others

Market Breakup by Region:

Asia Pacific
Europe
North America
Middle East and Africa
Latin America

About Us:

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their

businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing methods are at the top of the company's expertise.

Our offerings include comprehensive market intelligence in the form of research reports, production cost reports, feasibility studies, and consulting services. Our team, which includes experienced researchers and analysts from various industries, is dedicated to providing high-quality data and insights to our clientele, ranging from small and medium businesses to Fortune 1000 corporations.
