

Medical Implants Market Report 2022 Future Analysis, Demand by Regions and Opportunities with Challenges 2032

The global medical implant market is projected to grow from a valuation of US\$14.75 billion in 2022 to US\$36 billion by the end of 2032.

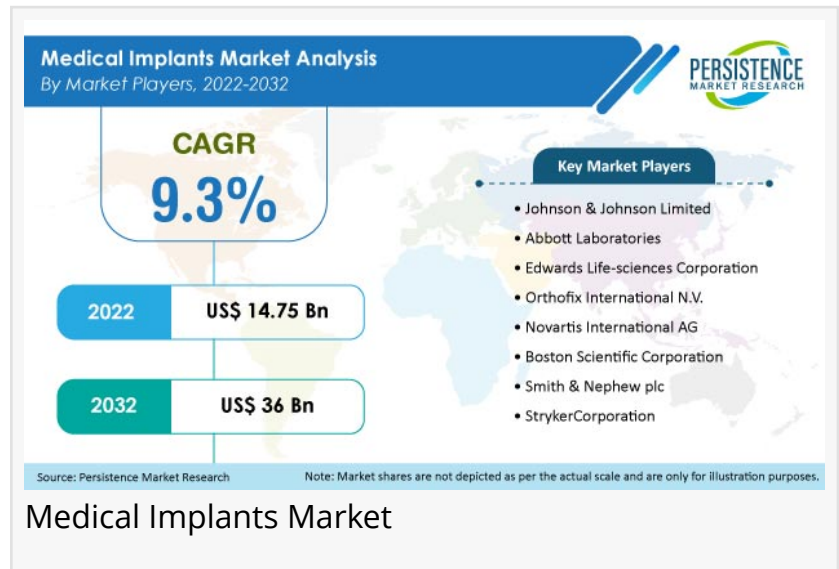

TOKYO, TOKYO, JAPAN, November 17, 2022 /EINPresswire.com/ -- The global [medical implant market](#) is projected to grow from a valuation of US\$14.75 billion in 2022 to US\$36 billion by the end of 2032. The market is likely to progress at a high value CAGR of 9.3 % through 2032, according to the latest industry analysis from Persistence Market Research.

Medical implants are artificial tissue or devices used to replace damaged biological structures or enhance an existing biological structure. Some of the implants are made of skin, bone or other body tissue. Others are made of metal, plastic or ceramic materials. Medical implants can be permanent or can be removed when they are no longer needed. There are some risks and complications associated with medical implantation, such as infections, surgical risks, and implant failure. Medical implants are used in areas such as cardiovascular, orthopedic, neurological, dental and other disorders.
