As per The Business Research Company's "[IVF Services Global Market Report 2022](#)", the [IVF services market](#) size is predicted to reach a value of \$12.74 billion in 2020 to \$13.782 billion in 2021 at a compound annual growth rate (CAGR) of 8.1%. The ivf services market growth is mainly due to the service providers resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to grow at a CAGR of 11.5% from 2020 to reach \$21.97 billion in 2025. The global IVF services market is expected to reach \$37.36 billion in 2030, at a CAGR of 11.2%. The rising infertility rate forcing women to

Key Trends In The IVF Services Market

The demand for mitochondrial replacement in IVF treatment is increasing to avoid mitochondrial

disorders in new born babies. Mitochondrial disorders are often inherited disorders that occur when mitochondria fail to produce enough energy for the cells to function properly. Mitochondrial replacement or transfer therapy is a technique in which unhealthy DNA is replaced in human eggs with healthy mitochondria from a donor woman during the IVF process. For instance, in February 2018, the Human Fertilization and Embryology Authority, a UK government regulator for assisted fertility services, approves first UK license to carry out mitochondrial donation. In February 2021, The Lily Foundation invested GBP 80 million to conduct research on mitochondrial diseases.

### Overview Of The IVF Services Market

The IVF services market consists of sales of in vitro fertilization (IVF) services by entities (organizations, sole traders and partnerships) that provide IVF services which is one of the more widely known types of assisted reproductive technology (ART) used to address infertility. IVF is a process of fertilization where an egg is combined with sperm outside the body, in vitro ("in glass").
