

GenieMD joins Innovators' Network at American Heart Association Center for Health Technology & Innovation

American Heart Association consortium advances development of evidence-based health tech solutions

DANVILLE, CA, UNITED STATES,
November 17, 2022 /

EINPresswire.com/ -- [GenieMD](#), global virtual care platform and services

provider, has joined the American Heart Association Center for Health Technology & Innovation's (the Center) Innovators' Network. The Center is focused on building and fostering health technology relationships to develop innovative and scalable solutions.

The American Heart Association Center for Health Technology & Innovation's (the Center) Innovators' Network is a critical voice in the transformation of the care continuum."

Thomas Foley, Chief Growth Officer, GenieMD

The Innovators' Network is a health care technology consortium that connects entrepreneurs, providers, researchers and payers. Innovators' Network members also have access to the Association's digital guidelines, recommendations, and best-in-class science as they develop digital healthcare technologies. Members collaborate with the Center in different ways, including the building of models for clinical outcome studies, lowering the significant cost of developing those studies independently, helping connect the science to technology, and providing evidence that a digital platform improves healthcare outcomes – a key concern for providers and payers.

"The Center aims to advance the rapid, efficient, and effective development of healthcare technology," said Robert A. Harrington, M.D., FAHA, past volunteer president of the American Heart Association (2019-2020), volunteer chair of the American Heart Association's Health Tech Advisory Group for the Center and Arthur L. Bloomfield professor and chair department of medicine, Stanford University. "Joining the Innovators' Network gives members the opportunity to leverage the consortium and work toward broadening and deepening their engagement in

this arena.”

“The American Heart Association Center for Health Technology & Innovation’s (the Center) Innovators’ Network is a critical voice in the transformation of the care continuum,” said Thomas Foley, Chief Growth Officer @ GenieMD, “We are encouraged about the opportunity to engage the Innovators’ Network to further elevate the value of our award-winning virtual care platform.”

About GenieMD

Based in San Francisco, California, GenieMD, Inc. is an award-winning, global provider of a modular, scalable, and customizable virtual care platform, inclusive of telehealth, remote patient monitoring, remote therapeutic monitoring, and chronic care management.
