Internet Of Things (IoT) Market Trends

Use of the IoT in the healthcare industry is a key trend gaining popularity in the IoT market. Remote monitoring in the healthcare industry has become possible due to Internet of Things (IoT)-enabled devices, unleashing the ability to keep patients safe and secure while also motivating physicians to provide exceptional treatment. The IoT is significantly changing the

healthcare sector by redefining the space of devices and human involvement in the delivery of healthcare solutions. For instance, according to a study by data driven investor, the healthcare sector accounted for 40% of all IoT devices in 2020, and revenues from healthcare-related IoT are expected to reach $135 billion by 2025.

[Internet Of Things (IoT) Market Overview](#)
The internet of things (IoT) market consists of sales of internet of things (IoT) systems and related services by entities that develop internet of things (IoT) systems. The internet of things (IoT), is a collection of interconnected smart devices, mechanical and digital machines, objects or people supplied with unique identifiers (UIDs) and the ability to transmit data across a network without needing human-to-human or human-to-computer interaction.
