

Endoscopic Closure Systems Market to reach over USD 1.22 billion by the year 2030 - InsightAce Analytic

Global endoscopic closure systems market is estimated to reach over USD 1.22 billion by 2030, exhibiting a CAGR of 7.51% during the forecast period.

NEW JERSEY, NJ, USA, November 21, 2022 /EINPresswire.com/ -- InsightAce Analytics Pvt. Ltd. announces the release of a market assessment report on the "[Global Endoscopic Closure Systems Market](#) (By Product (Endoscopic Clips/End Clips (Over-The-Scope Clips), Overstitch Endoscopic Suturing Systems, Endoscopic Vacuum-Assisted Closure Systems And Other Products), Distributional Channel (Direct And Indirect) And End-Use (Hospitals, Clinics And Ambulatory Surgery Centers))- Market Outlook and Industry Analysis 2030"

Global Endoscopic Closure Systems Market info

Key Players in the Endoscopic Closure Systems Market: Coopersurgical, Steris, Apollo Endosurgery, Boston Scientific Corporation, Ovesco Endoscopy Ag, Abbott, Medtronic, Olympus Corporation"

Insightace Analytic

The global [endoscopic closure systems](#) market is estimated to reach over USD 1.22 billion by 2030, exhibiting a CAGR of 7.51% during the forecast period.

An endoscopic suturing device that permits the installation of running or interrupted full-thickness sutures was developed. This gadget was based on the Eagle Claw device, but it was more sophisticated and could only be

used with one endoscope. Because of their advantages over previously available equipment, endoscopic suturing systems are projected to transform the endoscopic closure systems market. The major key factors driving the growth of the global endoscopic closure systems market are

the increasing need for and interest in developing dedicated devices and techniques that enable the endoscopic closure of small GI perforations, as well as the increasing adoption of minimally invasive endoscopic procedures. The increased global prevalence of gastrointestinal and stomach cancer is likely to impact the market substantially. The market is expected to develop significantly as the older population grows. Endoscopic surgery is gaining popularity because it uses advanced technology to reach interior organs through small incisions, resulting in less discomfort and faster recovery than traditional surgical approaches. These reasons are anticipated to stimulate demand for endoscopic closure systems. The market's progress is limited by a scarcity of competent personnel experienced in performing endoscopic operations.

Prominent Players in the Endoscopic Closure Systems Market:

Coopersurgical, Inc. (The Cooper Companies Inc.)

Steris

Apollo Endosurgery, Inc.

Boston Scientific Corporation

Ovesco Endoscopy Ag

Abbott

Medtronic

Olympus Corporation

Teleflex Incorporated

B. Braun Melsungen Ag

Market Dynamics:

Drivers-

Market drivers, such as the increased demand for endoscopic closure devices to treat gastrointestinal perforations, are being heavily used by market players to attain growth potential. Endoscopic closure devices market growth will be driven by the increasing need for endoscopic closure devices to treat gastrointestinal perforations. Advances in endoscopic closure device technology will further support market expansion. Market players are investing heavily in R&D to develop and launch devices that are precise, safe, efficient, easy to maneuver, have improved ergonomics, and have an intuitive user interface. These design improvements have resulted in more reliable results from these devices, contributing to the demand for advanced endoscopic closure devices.

Challenges:

The market's progress is limited by a scarcity of competent personnel experienced in performing endoscopic operations. However, factors such as the availability of substitutes will threaten market participants' growth. High expenses, the danger of infection, and tight rules and regulations established by multiple government agencies will hinder the market for endoscopic closure.

Regional Trends:

The North American endoscopic closure systems market is expected to register a share in the market. Investments in technologically advanced research and treatment platforms, rising cancer and GI tract problem incidence, and the presence of a large number of endoscopic clip manufacturers in the region are expected to be significant growth factors in the endoscopic closure system market. The growing usage of improved diagnostic tools in gastrointestinal (GI) disorders such as inflammation, surgical anastomoses, and neoplastic fistulae, as well as the existence of essential market competitors, are driving growth in the United States. Besides, Asia Pacific had a substantial share in the endoscopic closure systems market. The region's market is expanding due to an increase in arterial bleeding among cardiac patients and GI-related surgeries, which have the most significant market share due to the large patient population.

Recent Developments:

- In July 2022, Apollo Endosurgery, Inc., a global leader in minimally invasive medical devices for gastrointestinal and bariatric surgeries, announced the electronic publication of the landmark Multi-center ESG Randomized Interventional Trial (MERIT) Study in The Lancet.
- In February, 2022-CooperCompanies stated that it signed a binding letter of intent to acquire Cook Medical's Reproductive Health business, a minimally invasive medical equipment manufacturer.

Segmentation of Endoscopic Closure Systems Market-

By Product-

- Endoscopic Clips/Endoclips (over-the-scope Clips)
- Overstitch Endoscopic Suturing System
- Endoscopic Vacuum Assisted Closure System
- Other Products

By Distribution Channel

- Direct
- Indirect

By End-use

- Hospitals
- Clinics
- Ambulatory Surgery Centers

By Region-

North America-

- The US

- Canada

- Mexico

Europe-

- Germany

- The UK

- France

- Italy

- Spain

- Rest of Europe

Asia-Pacific-

- China

- Japan

- India

- South Korea

- South East Asia

- Rest of Asia Pacific

Latin America-

- Brazil

- Argentina

- Rest of Latin America

Middle East & Africa-

- GCC Countries

- South Africa

- Rest of Middle East and Africa
