Pet food is plant-based or animal-based food that is specifically formulated and intended for consumption by pets. It comprises

ingredients such as animal derivatives, cereal and cereal by-products, fish derivatives, fruit and vegetable derivatives, fats and oils, vitamins and minerals, and additives. At present, the research and studies conducted by the manufacturers have increased the knowledge of pet nutrition among the masses, hence safe and high-quality pet food is being produced to meet the nutritional requirements of pets. The demand for pet food is increasing across the GCC region due to the growing consumer interest in natural formulations.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviors of the consumers globally—our estimates about the latest market trends and forecast values after considering the impact of this pandemic.
