## COVID-19 Scenario

The COVID-19 outbreak has created a significant impact on the global economy, with businesses across various sectors already feeling the pinch. The situation is likely to get worse in the coming months, as the virus continues to spread. The metals and ceramics industry is no exception, with the MCH heaters market being one of the most affected.

Demand for MCH heaters has declined sharply in recent weeks, as businesses across the world cancel or postpone orders. This is likely to have a knock-on effect on production levels and prices in the months ahead. In addition, COVID-19 is also disrupting supply chains, with many manufacturers facing shortages of raw materials and components. This could lead to further delays and disruptions in the market.

The situation is also having an impact on the competitive landscape, with some companies delaying or cancelling investment plans. This could create opportunities for other players in the market. However, it is still too early to say how long-term these effects will be.
