*The Business Research
Company*

Boat building manufacturers are increasingly offering self-sailing boats to cater to the growing demand for autonomous sailing. Self-sailing boats are designed with software that allow boats to independently move from point-to-point, avoiding obstacles and working with other boats along the way. A number of maritime businesses are using remote control and self-sailing boats. These autonomous self-sailing boats are also being adopted for ocean research.

[Boat Building Market Overview](#)

The boat building market consists of sales of new boats and related services by entities (organizations, sole traders and partnerships) that operate boatyards. Boatyards are fixed facilities with drydocks and fabrication equipment capable of building boats, including dinghies, hovercrafts, motorboats, rowboats, yachts, sailboats, and inflatable rubber boats.
