Dry Eye Medication Market Trends

Development of combination therapies for the treatment

of dry eye related diseases is an emerging trend in the dry-eye medication market. Combination therapy involves the use of more than one medication or drug to treat a disease. These combinational therapies reduce the frequency of administration of eye drops or drugs, and reduce the possibility of vascular endothelial growth factor (VEGF) expression, choroidal neovascularization and inflammation.

[Dry Eye Medication Market Overview](#)

The dry eye medication market consists of sales of dry eye drugs and other related services by entities (organizations, sole traders and partnerships) that manufacture dry eye medication (or drugs) used to treat dry eyes. The dry eye medication market covers drugs that are used in the treatment of diseases related to dry eyes, irritation, pain, and infection.
