EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Lycopene market](#) size is forecast to reach \$150.2 million by 2026, growing at a CAGR of 5.3% during the forecast period 2021-2026. Lycopene is a dark red carotenoid hydrocarbon present in

tomatoes and in a variety of other red fruits and vegetables such as red carrots, grapefruits, watermelons, and papayas. Lycopene, on the other hand, Lycopene is a carotene which does not have vitamin A activity. Asparagus, parsley, and guava are examples of non-red foods that can contain lycopene. Lycopene acts as an intermediate in the biosynthesis mechanism of certain carotenoids, such as beta-carotene, and is responsible for yellow, red, and orange pigmentation, photoprotection, and photosynthesis in plants, algae, and other photosynthetic species. Lycopene is used in dietary supplements because it is easily absorbed by the body. It is used to treat elevated cholesterol, high blood pressure, and certain cancers since it acts like an antioxidant, protecting cells from more harm.
