"Great Majestic India: rays of hope for global peace-prosperity" book is available on Amazon!!

Great Majestic India

The book is all about: How India (being the largest Federal Democracy of the world and 5th Largest Global Economy) can do to help make a Better New World. This book is part of the book

Great Majestic India, rays of hope for global peace-prosperity!

Dr. Madhab Paul, author of the book: "Great Majestic India, rays of hope for global peace-prosperity"

series, "New Ideas at Work" in the new world order.

The book contains Key Concepts that can make India stronger and in turn India will be able to help the needy better. The concepts may contradict common knowledge. And the truth is: Common Knowledge changes as we explore, innovate and know more facts.

Dr. Madhab Paul is the Founder, Director & MD of MiTA. Innovation is the center pillar of MiTA: management, innovation & technology applications

Let's explore a few key concepts from the book:

1. Often, Perception leads to future reality. Should we redefine "Perceptions, Geographical Categories, and Rename" to accelerate development and global peace-prosperity?

“

The book, "Great Majestic India: rays of hope for global peace-prosperity" explores: "How India, the largest Democracy & 5th largest Global Economy, can help make better New World?"

*Dr. Madhab Paul, PhD*

2. Should we inverse the Economic Dependency Theory because natural resources are becoming limited? Will the resource rich countries soon take control and set the "New Basic T&C" for global trade & investment negotiations in the New World?

3. Large young population is a great natural resource to capitalize with the new FTA T&C.

4. Per Capita Pie-slice, Increasing Pie Size & Freedom of Movement: why India need to set the precedence along with UK, while finalizing India-UK Free Trade Agreement for a better equitable world?

5. In today's Digital Global World, freedom is global and economic interests are international, no more bounded by country's boundary.

6. Redefine: Are South Asia & South East Asia "imaginary" geographically divided categories? Will the "BIMSTEC Economic Region" be the future regional development?

7. Sanskrit, Pali, Hindi, Bengali, UN Languages, and BIMSTEC Global University for Languages & Business: can language diplomacy integrate regional economy?

8. Kohinoor & English Language: which is more precious?

9. Intangible Asset, English Language: How many ways Indians can leverage English as an Indian intangible asset?

10. Does Commonwealth foster memories of colonization and induce "perceived" power imbalance?

11. How can India help to create a better equitable platform: Rays of Hope Organization for accelerating peace-prosperity? Will that be better?

12. Indian Federal Economic Diplomacy: Will India revisit golden history and restart sending Peace-Prosperity Envoys?

13. Global Respect & Self-reliance are intricately intertwined. Only and only, globally well-respected India can help transform "Indian neighborhood and beyond" into a progressive developed region.

14. Why does India need to set the New Rules to restrict the scope of re-export to minimize resource-flight?

15. Global Indian Governance Institute: Will India go global to protect the economic interests of India & 1.4 Billion Indians?

16. Country's Sovereignty & International Commercial Arbitration: how are they interrelated?

17. UK, India & Global Business: How millions of Indian Lawyers, Tech, English Law and English can be utilized for the benefit of global businesses?

18. Political Enterprise, Power, Philanthropy, Money, Monopoly, Truth Decay & Virtual State: what future democracies will look like?

The important first step for any innovation towards success (and progress of humanity) is to "identify, define & review" the potential problems and search for the solutions well before the "now invisible or apparently small" problems cause great pains in the future. The purpose has always been to define apparently invisible Big Problems but the "issues & facts" may appear contrarian to common knowledge. And the fact is: Common Knowledge changes as we explore, innovate & know more.

Peace can bring prosperity. Health is wealth. Education enlightens minds. Change in Perception can change the future reality. Love is the source of creative energy. Celebrating Eternal Love & Life!!

Come on, let's explore the New Ideas at Work that can make our communities a better place to live and thrive.

Welcome!! As we celebrate Life & Love, let's have a look at the book, Great Majestic India : rays of hope for global peace-prosperity; and explore more!!
