The Global Patient Portal Software Market Report detailed information and overview highlight the most recent trends in various regions. Leading market participants will benefit from the trading insights provided in this report. The Patient Portal Software Market research report is an intelligence report that includes precise and valuable data on market size, development countries, market share, and revenue forecasts through 2028. It also provides information on the market’s development and capabilities.

“

The purpose of patient portal services is to provide easy access to patients as well as healthcare practitioners to patient data.”

*Coherent Market Insights*

Global Patient Portal Software market was valued at USD 1,143.1 Million in 2021 and is expected to reach USD 2.2 Billion by 2028 Growing at a CAGR of 7.6% between 2022 and 2028.

Consumer portals are web-based software used in the healthcare sector to keep track of health-care provider appointments, test outcomes, billing, orders, and other information that improves patient-provider engagement.

These gateway systems can be evaluated across the internet by accessing a website or program, allowing patients to view data via their cell phones, laptops, and other devices from any location and at any time. Patient portal systems can be divided into two categories: isolated and combined. Standalone services are any specific tool for patient interaction, while centralized

services can be used for various purposes or to offer a one-stop approach for services such as appointment scheduling, medical billing, e-prescriptions, patient history management, and more.
