

# Latest Carbon Fibre Stab Vests Also Offer Certified Spike Protection

*PPSS Group highly anticipated stab vests benefit from latest technology and highlight knife and spike protection advancement.*

WETHERBY, WEST YORKSHIRE, UNITED KINGDOM, November 23, 2022 /EINPresswire.com/ -- [PPSS Group](#) highly anticipated [stab vests](#) benefit from latest technology and highlight knife and [spike protection](#) advancement.

According to their CEO Robert Kaiser, the decision in 2019 was based on the company's comprehensive understanding of the most realistic operational risks and threats, faced by today's private security professionals,

The firm's product video, featuring him being subjected to a series of attacks with knives, spikes and blunt objects is widely regarded as 'physical evidence' of its outstanding performance level and quality.

PPSS Group's CEO Robert Kaiser states:

"Following years of relentless R&D we have concluded in 2019 that Polycarbonate as a raw material was simply no longer on par with the threats some of our men and women face. We had learn at that time to accept that improved knife and spike protection was indeed needed."

“We concluded that carbon-fibre was the only real reliable and forward-thinking solution. Utilising the latest raw material and production technology made us understand what truly superior levels of stab and spike protection could be achieved.”

According to Kaiser, certified stab and spike protection is crucial, especially to correctional and prison officers who face some of the cruellest makeshift weapons, such as shanks and spikes daily.

Spike protection has now also become of equal importance to private security professionals, simply due to the type of weapons appearing on the streets in recent years.

Religious extremism, terrorism, social deprivation, immigration, a lack of respect and discipline, and an overall breakdown in society all had an impact on to the increasing number of knives and edged weapons being carried, and on the kinds of edged weapons essentially being used.

In recent months and years we have seen extremely evil individuals walking the streets, carrying ‘Samurai’ swords, meat cleavers and machetes, brutally assaulting and indeed slaughtering innocent people, often driven by rage and extremism, in many cases committing multiple homicide or mass murder.

#### Certified Performance Levels

CAST KR1/SP1 Stab & Spike – (CAST Body Armour Standard 2017)

VPAM W5 ‘Impact Protection’ – (VPAM KDIW 2004 – Edition 18.05.2011)
