forecasts the healthcare cyber security market is expected to grow from \$13.18 billion in 2021 to \$15.70 billion in 2022 at a compound annual growth rate (CAGR) of 19.1%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. The [healthcare cyber security market trends](#) are expected to grow to \$30.24 billion in 2026 at a CAGR of 17.8%.

The increasing cases of healthcare cyber-attacks are expected to drive the growth of the healthcare cyber security global market going forward.

Healthcare Cyber Security Market Trends

Technological advancement is the key trend gaining popularity in the healthcare cyber security market. Major companies operating in the healthcare cyber security market are focused on developing technologically advanced products to strengthen their market position.

Healthcare Cyber Security Market Overview

The healthcare cyber security global market consists of sales of healthcare cybersecurity services by entities (organizations, sole traders, and partnerships) that are used to prevent cyber-attacks by defending systems from unauthorized access, use, and disclosure of patient data. Healthcare cybersecurity is a strategic necessity for all medical industry organizations, including healthcare providers, insurers, pharmaceuticals, biotechnology, and medical device firms. It entails a range of actions to safeguard organizations from internal and external cyber-attacks, guarantee the availability of medical services, ensure the proper operation of medical systems and equipment, maintain the confidentiality and integrity of patient data, and comply with industry regulations.
