Gold is basically a metal that appears slightly bright reddish yellow in colour and is referred to as Au in the periodic table. The molecular weight of gold is about 196.966g/mol. Gold remains solid under standard conditions and is a less reactive metal.

Besides gold is the purest form of metal and hence is malleable and ductile. It is extracted by abstraction of the metal and crushing of the ores and is followed by refining it chemically and electrolytically.

The largest producer of gold region-wise is China which accounts for about 10 percent of the total population globally. Whereas Australia and Russia are also the top two producers of gold after China.

Key Details:

Procurement Resource does an in-depth analysis of the price trend to bring forth the monthly, quarterly, half-yearly, and yearly information on the gold price, [lithium carbonate price](#) and [carbon black price](#) etc. in its latest pricing dashboard. The detailed assessment deeply explores the facts about the product, price change over the weeks, months, and years, key players, industrial uses, and drivers propelling the market and price trends.

The gold price chart, pricing database, and analysis can prove valuable for procurement managers, directors, and decision-makers to build up their strongly backed-up strategic insights to attain progress and profitability in the business.
