Cold Pressed Oil Market Report

Cold-pressed oil, also known as cold-drawn or virgin oil, is a purer form of naturally extracted oil. It is extracted from pressed vegetables, seeds, nuts, and fruits. It is a rich source of antioxidants, oleic acid, essential polyunsaturated fatty acids, and vitamins E, K, and C, which help to mitigate the risk of heart diseases, resist inflammation, offer constipation relief, and moisten skin. It also contains Vitamin E and phenols, which helps lower bad cholesterol and blood pressure levels, protect the liver from oxidative damage, and suppress oxidative stress. Owing to these properties, cold-pressed oil is widely used in the food, agriculture, cosmetics, and personal care industry.

Global Cold Pressed Oil Market Trends:

The market is primarily driven by the significant expansion of the food and beverage (F&B) industry. In addition, the rising awareness among consumers regarding the high nutritional value and various health benefits associated with consuming cold-pressed oil is contributing to the market growth. Health-conscious consumers are adopting cold pressed oil in cooking, marinating salads, and dietary supplements. Moreover, the escalating demand for cold-pressed oil in the cosmetic industry as a natural ingredient for manufacturing several beauty care

products to moisturize skin and eliminate dandruff from hair is providing a thrust to the market growth. Cold-pressed oils consists of fatty acids, such as oleic and linoleic acid, which are highly beneficial in treating acne, as they are rich in antioxidants, brighten skin, and prevent acne. Besides this, the easy product availability on several online and e-commerce retailing distribution channels at cost-effective rates is also accelerating product demand across the globe. Furthermore, investments in research and development (R&D) activities and strategic collaborations amongst key players to introduce eco-friendly procedures to produce cold-pressed oil is creating a positive market outlook.
