

Dry Eye Syndrome Market Size to reach USD 5,465.0 million By 2027 Growing at 4.8% CAGR | GlobalData Plc

LONDON, UK, November 24, 2022 /EINPresswire.com/ -- The global dry eye syndrome market size reached USD 5,465.0 million in 2021, according to a new report by GlobalData Plc. Dry eye syndrome (DES), also known as keratoconjunctivitis sicca (KCS), is a multi-factorial disease of the eye characterized by dryness, decreased tear production, or increased tear film evaporation. Patients with DES experience symptoms of discomfort, such as visual disturbance and tear film instability. DES is more common in women and particularly in postmenopausal women. Sex hormones are known to play a significant role in ocular surface homeostasis, and studies are investigating the mechanisms by which disturbances in ocular surface homeostasis may result in DES.

Anti-androgen therapy, Sjögren's syndrome, and premature ovarian failure also may increase the risk for DES, as these conditions are associated with androgen deficiency. The research on dry eye syndrome is significant due to the rising frequency of its occurrence, multiple risk factors linked with the disease, and problems in disease treatment. According to reports published by the United Kingdom Statistics Authority, in 2019, nearly 21,900 people were registered as eye related. This rising prevalence of ophthalmological diseases and their related complications directly promotes the growth of this market.

The pharmaceutical sector has prioritized the development of new medicine for the treatment of dry eyes. Even though dry eye is the most common eye illness, it is not life-threatening, and its

symptoms are not severe, there is a limited supply of effective treatment medicines. Dozens of businesses have a wide range of novel treatment possibilities in their pipelines, but the disease's overall complexity makes it difficult to manage. Only a few medications have been approved so far for the treatment of dry eye illness, but the potential for advancement in this field is enormous. As a result, many new possible remedies are being developed or placed in the pharmaceutical pipeline, promising greater outcomes and fewer side effects.

GlobalData Plc has segmented the Dry Eye Syndrome market report by Product, Therapeutic Area, and region:

Dry Eye Syndrome Products Outlook (Revenue, USD Million, 2020-2027)

- Anti-inflammatory Drugs
- Artificial Tears
- Punctal Plugs
- Secretagogues

Dry Eye Syndrome Dosage Form Outlook (Revenue, USD Million, 2020-2027)

- Eye Drops and Solutions
- Gels and Ointments
- Capsules and Tablets

Dry Eye Syndrome Distribution Channel Outlook (Revenue, USD Million, 2020-2027)

- Hospital Pharmacy
- Retail Pharmacy
- Online Pharmacy

Dry Eye Syndrome Regional Outlook (Revenue, USD Million, 2020-2027)

- North America
- US
- Canada

- Europe
- UK
- Germany
- France
- Italy
- Spain
- Rest of Europe

- Asia Pacific
- China
- Japan
- India
- Rest of Asia Pacific
- ROW
