Specialty Lighting Market 2022 - Opportunities And
Strategies – Global Forecast To 2030

The Business Research Company's "Specialty Lighting Global Market Report 2022" forecasts the specialty lighting market to reach a value of \$6.00 billion in 2022 at a compound annual growth rate (CAGR) of 10.8%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. The [specialty lighting market size](#) is expected to grow to \$7.94 billion in 2026 at a CAGR of 7.2%.

Specialty Lighting Market Trends

The adoption of the internet of things and smart lighting is a key trend gaining popularity in the

specialty lighting market. Major market players are concentrating their efforts on implementing artificial intelligence (AI) and the internet of things (IoT) in specialty lights to aid users in several aspects that allow customization, scheduling, and remote control of light. For instance, in October 2020, Panasonic, a Japanese-based consumer electronics manufacturer, launched Wi-Fi-enabled smart led bulbs with automated scheduling functions and voice command features in India, enabling features such as user data security, auto-scheduling of lights, and multi-color options of lighting. The Panasonic Smart Wi-Fi app, which is freely accessible on the Google Play Store and App Store, may be used to control the new Smart Wi-Fi LED bulb. The experience of the product can be improved by using Google Assistant and Alexa's voice commands to connect to and operate the lightbulb. The Smart LED Bulb will eventually be a component of the linked ecosystem that is seamlessly integrated with Panasonic's MirAle, an advanced IoT and AI-enabled connected living platform. The user data security features of this software are genuinely exceptional.

Specialty Lighting Market Overview

The specialty lighting market consists of sales of specialty lighting products by entities (organizations, sole traders, and partnerships) that are used in specific applications such as stage and studio, automotive or marine, medical or scientific, and water or air sanitizing lighting. Specialty lighting refers to lighting of certain shapes, bases, designs, and special built-in characteristics that accomplishes different lighting tasks. Due to its size and functionality, specialty lighting is used where standard lighting is unsuitable.
