Endpoint Security Global Market Report 2022 –
Market Size, Trends, And Global Forecast 2022-2026

The Business Research Company's "Endpoint Security Global Market Report 2022" forecasts the endpoint security market is expected to grow from \$14.05 billion in 2021 to \$15.38 billion in 2022 at a compound annual growth rate (CAGR) of 9.5%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. The end-point security market is expected to grow to \$22.00 billion in 2026 at a CAGR of 9.4%.

[Endpoint Security Market Trends](#)

The advent of disruptive technologies is the key trend gaining popularity in the end-point

security market. Major companies operating in the market are introducing disruptive technologies to sustain their position in the end-point security market.

[Endpoint Security Market Overview](#)

The end-point security market consists of sales of end-point security products and related services by entities (organizations, sole traders, and partnerships) that are used to protect organisations from increasingly dangerous cyber threats. End-point security refers to a process of securing or protecting devices such as laptops, mobile phones, desktops, and tablets from cyber-attacks and malicious threats. With the help of this, businesses can protect their devices that are used by employees for work purposes.
