NEW YORK CITY, NEW YORK, UNITED STATES, November 24, 2022

/EINPresswire.com/ -- The global [corn fiber market](#) is expected to reach a market size of USD 1,154.6 Million by

2027 at register a steady CAGR over the forecast period, according to the latest report by Reports and Data. Growing demand for corn fibers from the textiles industry is a key factor driving market growth. Corn fiber is a natural fiber and an ideal substitute for synthetic fibers such as polyester and polyamide. Garments produced from corn fibers are comfortable to wear and offer good moisture management and low odor retention. In addition, garments produced from corn fibers exhibit easy stain and dirt removal and have fast-drying properties, along with ability to retain good aesthetic appeal even after repeated washes.

Growing demand for eco-friendly alternatives for synthetic fibers is another factor driving demand for corn fibers. Extensive use of harmful and harsh chemicals modifies the natural characteristics of fabrics and pollutes soil, underground water reserves, and air. Also, these harmful chemicals release toxic gases. Increasing use of organic fibers for clothing, in the long run, is projected to be highly beneficial in reducing environmental pollution and impact.
