What is a the Oxygenators Market?

Oxygenators represents medical devices that are routinely used in medical settings to exchange oxygen and carbon dioxide from the patient's blood during surgeries. They can be broadly categorized into membrane oxygenators and bubble oxygenators.

These oxygenators are utilized in conjunction with heart-lung machines to facilitate gas exchange during surgical procedures in which the blood flow is interrupted or stopped. They even aid in managing cardiopulmonary, pulmonary, and respiratory disorders. As a result, oxygenators are extensively adopted in hospitals, clinics, and other healthcare establishments across the global.

What are the major market drivers in a Oxygenators market ?

The increasing prevalence of various coronary, cardiovascular, and orthopedic ailments among the masses, on account of the sedentary lifestyle, unhealthy eating habits, tobacco and alcohol consumption, etc., is primarily driving the oxygenators market. In line with this, the expanding geriatric population, which is highly susceptible to developing chronic diseases, is also positively influencing the market growth. Apart from this, the inflating investments by government bodies across countries to promote healthcare digitization, continual product innovation, and advanced infrastructure setup are acting as significant growth-inducing factors.

Moreover, the elevating mergers and acquisitions (M&As) activities among key market players to innovate state-of-the-art medical devices and the introduction of several favorable healthcare reimbursement initiatives are further stimulating the global market.

In addition to this, the rising usage of the equipment in numerous critical surgeries, such as cardiopulmonary bypass grafts (CABG) and coronary artery bypass grafts (CABG) and the shifting preferences toward membrane oxygenator variants for the treatment of neonates and pediatric patients are expected to propel the oxygenators market over the forecasted period.
