Key Takeaways:

This IndustryARC report on the LED Lighting Market highlights the following areas –

- LED Lighting Market is estimated to witness substantial growth over the forecast period primarily due to growing consumer demand for energy-efficient lighting systems, reduction in costs of LEDs.
- The LED Lighting consumes less electricity and also much cooler than incandescent lights and reduces the risk of combustion or burnt fingers.

- The applications of LED lighting are residential, industrial, outdoor and indoor.
- Asia-Pacific is projected to hold the largest share of LED Lighting Market during the forecast period due to the presence of large number of companies in Taiwan, Japan and China as they are the key contributors to the Asia-pacific market growth.

#### Segmental Analysis:

- By Type - The market segment by type is classified into into LED Lamp and LED Fixture. LED luminaire segment is expected to grow at a higher CAGR of 16.5% during the forecast period 2021-2026. It is due to luminaires that are widely used in commercial and industrial applications. They are easier to control and permit optic designers to use them more proficiently and use less light to illuminate the same area.
- By Application - The market segment by application is categorized into indoor and outdoor. The indoor segment is the leading segment of all the segments in terms of revenue. It is due to high product adoption as an alternative to incandescent lamps, high-density discharge, and fluorescent. They are used widely in offices, retail stores, malls, hospitals and more.
- By Geography - LED Lighting market by geography has been segmented into North America, Europe, APAC, South America and RoW. Asia Pacific is expected to dominate the LED Lighting Market with share of 60% in 2020 due to presence of large number of companies in Taiwan, Japan and China as they are the key contributors to the Asia-pacific market growth owing to the initiatives undertaken by the respective governments for adopting LED lights.
