Proliferation of Computing Across Education Sector Catalyzes Social and Emotional Learning Market Growth

Social and emotional learning solutions are increasingly used in schools and colleges to regulate emotions and encourage on-time graduation, aid in college enrollment, and enhance financial earning capability during the later stages of their lives. They also aid in enhancing the overall academic performance, scores, and grades along with supporting the cognitive, social, and mental well-being of students. Substantial growth in the education sectors across the world is one of the key factors leading to a positive outlook in the social and emotional learning market. These solutions can be implemented across areas with weak internet connectivity, and they help develop academic and noncognitive skills in children. As a result, the adoption of social and emotional learning solutions is increasing notably across developed and emerging economies. A surge in the adoption of connected and smart devices in e-learning and rapid digitalization in the education sector further accelerate social and emotional learning market growth.

Global Social and Emotional Learning Market Report encompasses an infinite knowledge and information on what the market's definition, classifications, applications, and engagements are and also explains the drivers and restraints of the market which is obtained from SWOT analysis. By applying market intelligence for this Social and Emotional Learning Market report, industry expert measure strategic options, summarize successful action plans and support companies with critical bottom-line decisions. Development policies and plans are discussed as well as manufacturing processes and cost structures are also analyzed. This report also states import/export consumption, supply and demand Figures, price, cost, revenue and gross margins. Additionally, the data, facts and figures collected to generate this market report are obtained from the trustworthy sources such as websites, journals, mergers, newspapers and other authentic sources.

Elementary schools are anticipated to be among the prominent end users of social and emotional learning solutions in the coming years. This segment of end users includes parents, teachers, principals, and legislators, who use social and emotional learning programs and activities to help students develop their academic and social skills. North America holds the highest share of the social and emotional learning market. Most companies in the market in this

region have already shifted to digital transformation to compete effectively with each other. In Asia-Pacific, the social and emotional learning market is anticipated to grow at a fastest rate and is expected to grow in the coming years. Increased support & awareness programs initiated by the government towards the importance of social and emotional learning programs in the education curriculum is one of the major factors contributing towards the social and emotional learning market growth in the region. However, higher focus on the academic than additional social and emotional learning programs in emerging nations and lack of proper infrastructure and IT support are expected to limit the social and emotional learning market growth.

Social and Emotional Learning Market Report displays data on key players, major collaborations, merger & acquisitions along with trending innovation and business policies. The report highlights current and future market trends and carries out analysis of the effect of buyers, substitutes, new entrants, competitors, and suppliers on the market. The key topics that have been explained in this Social and Emotional Learning Market report include market definition, market segmentation, key developments, competitive analysis and research methodology. To accomplish maximum return on investment (ROI), it's very essential to be acquainted with market parameters such as brand awareness, market landscape, possible future issues, industry trends and customer behavior where this Social and Emotional Learning Market report comes into play.

#### Key Findings of Study:

- North America is expected to hold the largest share of the social and emotional learning market during the forecast period.
- The increasing adoption of AI, AR, and VR learning trends in the K-12 sector is offering lucrative opportunities to the social and emotional learning market players.
- The social and emotional learning market is projected to reach US\$ 9.29 billion by 2028;

Social and emotional learning is the process of endorsing complete child development through digital solutions and services, and innovative teaching methods. These ways of learning are commonly adopted across elementary, pre-kindergarten, and middle and high school classrooms. Moreover, it promotes better mental wellness, along with intervention and prevention measures boosting the mental health ecosystem across the education sector. Self-regulation, persistence, empathy, self-awareness, and mindfulness are some of the major core competencies involved in social and emotional learning activities and programs. By playing an integral role in diversity, equity and inclusion (DEI) across education sectors, social and emotional learning helps students build a different perspective by embracing similarities as well as differences. It also enhances their ability to build relationships.
